

Getting started

What can I do?

You can use [Web Part Wizard](#) to create web parts or report views to be published on a [SharePoint](#) page or use [Analysis Wizard](#) to create analysis against your [Analysis Server](#) cubes.

How to create a web part?

Browse to your SharePoint page where you want to add the web part and then follow instructions in [Add web part](#). See [How to use web parts](#) for an example of a web part page included configured web parts.

How to create an analysis?

An analysis can either be created by [launching](#) a published web part, using the Analysis Wizard from the desktop or using Analysis Wizard from a [Analysis Link Web Part](#).

How to create a BSM (Business Scorecard Manager) report view?

Read [Add report view](#) for how to create and configure a [Business Scorecard Manager](#) Report View.

How to create your first dashboard step by step

1. [Prerequisites](#)
2. [Install DSP Portal Edition](#)
3. [Create a dashboard](#)
4. [Start the wizard](#)
5. [Create a data source](#)
6. [Create a DSP Chart web part](#)
7. [Create a DSP Filter web part](#)
8. [Connect the chart to a filter](#)
9. [Try some features on your first dashboard](#)
